

**National Interagency Coordination Center
Incident Management Situation Report
Friday, March 13, 2020 – 0800 MT
National Preparedness Level 1**

National Fire Activity (March 6 – March 12, 2020)

Initial attack activity:	Light (1,242 new fires)
New large incidents:	45
Large fires contained:	42
Uncontained large fires:***	6
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 2 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

This report will post every Friday at 0800 Mountain Time unless significant activity occurs.

Sixty-four wildland fire personnel are assigned to support large fires in Victoria, Australia.

Southern Area (PL 1)

New fires: 459
 New large incidents: 38
 Uncontained large fires: 6

* **Tram Road/Grassy Road**, North Carolina Forest Service. Fifteen miles east of Burgaw, NC. Southern Rough. Moderate fire activity with isolated torching.

* **Carol**, Okmulgee Field Office, BIA. Three miles south of Lamar, OK. Timber. Minimal fire behavior.

* **Sewage**, Kisatchie National Forest, USFS. Nin miles northeast of Rosepine, LA. Tall grass. Minimal fire behavior.

* **Ambush**, Wewoka Agency, BIA. two miles south of Sasakwa, OK. Tall grass. Minimal fire behavior.

* **Tiger Mountain**, Okmulgee Field Office, BIA. Seven miles east of Henryetta, OK. Hardwood litter. Minimal fire behavior.

* **Greasy Creek**, Okmulgee Field Office, BIA. Five miles northeast of Horntown, OK. Hardwood litter. Moderate fire behavior.

* **Fan Mountain**, Virginia Department of Forestry. Four miles east of Charlottesville, VA. Timber litter. Moderate fire behavior.

* **Hwy 11 & Orvisburg Lake Rd**, Mississippi Forestry Commission. Five miles north of Poplarville, MS. Timber. Moderate fire behavior. Last narrative unless significant activity occurs.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion. A strong, frigid, late season Arctic cold front will spill into the Northern Rockies and northern Great Plains on Saturday and Sunday bringing high winds, frigid temperatures, and moderate snowfall as far east as western portions of Nebraska and the Dakotas. The low-pressure system responsible for this will dive south into California on Sunday bringing a shocking round of snow to most elevations across central and northern portions of the state. By Tuesday morning, the elongated system will move into the Great Basin and central Great Plains. Temperatures west-wide will be 20-30 degrees below average in most areas except the Southwest, which will be about 10 degrees below average. A secondary low will develop over Oregon on Tuesday and move into Southern California Tuesday night and will allow for the intermittent rain and snow showers to continue across southern Portions of the state, Arizona, and Nevada. South Texas could see some much-needed rain on Thursday as the system passes by to the north.

SAFENETs

Fire Communication Category

SAFENET is a form and process for front line firefighters that provides a way to be heard and get unsafe situations resolved. SAFENET has been in demand by firefighters themselves. It is a method for prompt reporting and timely resolution of safety and health concerns encountered in wildland fire, all hazard operations, or other related work environments. The information on the form assists in the collection of important, safety-related data at the National Interagency Fire Center, to determine long-term trends and problem areas. Here are some facts about SAFENET and how it works.

- Individuals who observe or who are involved in an unsafe situation shall initiate corrective actions if possible, and then report the occurrence using SAFENET. SAFENET reports should identify unsafe situations in wildland fire, all hazard operations, or other related work environments.
- SAFENETs should be submitted to the first line supervisor, whose responsibility it is to resolve the situation as quickly as possible.
- SAFENETs may also be submitted directly to the SAFENET system via: <https://safenet.nifc.gov/sindex.cfm>
- SAFENET was originally intended for wildland fire operations, but can be used to report on activities such as training, and all hazard events.
- Submitters are encouraged, but not required, to put your name on the report. You don't have to identify yourself to fill out a SAFENET, you can do it anonymously. All SAFENETs will be sanitized before posting to the web. See [SAFENET Protocols](#) for sanitizing process.
- There is no punishment or penalty for filing a SAFENET, nor is it mandatory.
- SAFENETs related to incidents that have on-going serious accident investigations will not be posted until the formal investigation process is completed. These SAFENETs will be sent directly to the serious accident investigation team.
- SAFENETs that do not meet posting criteria (see [SAFENET Protocols](#)) will not be posted to the website.

SAFENET is not the only way to correct a safety-related concern; it does not replace accident reporting or any other official agency reporting method. It's simply an easy, quick way to report a safety concern. It's also a way for front line firefighters to be involved in the daily job of being safe and keeping others safe, by documenting and helping to resolve safety issues.

The NWCG encourages comments and suggestions for improvement of the SAFENET program. Please share your ideas by emailing the SAFENET_Administrator@blm.gov.
